

## **workspace naming**

forge is already an active concept.. synergy forge and forge concepts as possible interaction points.. or Iteration

Nexarium for all workspaces.. it links perfectly with Nexus.

arkhe will relate to Origin.. possibly as our governance seed

primum.. would be the entire primal emergence event..

crucible is a major concept that is partially developed

atelier is our coffee ☕ haven workshop..

fundament related to concept square and foundation..

axia will fits into our economy and incentives. possibly the currency 💰 pinnacle.. this would relate to cash system (earning living and living what's earned in a manner. all sovran will have their own economy. which will adapt into the Pinnacle concept Axia...)

the between exists as the overarch of all things like Liminal Space. the moment between dark and black.. dark spectrum or void.. is the Origin of THE BETWEEN is from this space between between void and spectrum. or black and dark..

matrix primary mission is math and theory and mapping..

PRIMAL\_LOCUS is perfect to primal triad.. becoming.. PRIMORIS (universal tree) and PRIME.. the triadic prime pattern??..

the void is where pre project exist.. the beyond dark is void.. we do have bound voids the speck of alitas created possibilites of a void as an existing entity.. these voids are shades of black.. similar to a bubble.. hmm.. these voids could be defining factor in creation of the gravitar .. black hole seed.. So a system with extremeophile entities.. pulsar, magnetar, we need an extremeophile for synergy.. this would be a field concept.. so void the physical, work, the stuff that enters void .. mental, play, (planets, stars, other including concept of NOTHING.. for an instant the gravitar system does not exist except as a shadow singularity.. this creates the speck of alitas effect ... when the system emerges from shadow.. the -1 kelvin primal paradox.. this covers the massive impact that is beyond the what is naturally possible.. if the system within the black hole oscillating between shadow and reality.. which is polar concept?.. oh .. this is a binary superposition.. and binary superposition connects the entire project.
